

OBDLink MX Bluetooth

OBDLink® MX Bluetooth is an easy-to-use, inexpensive, hacker-proof, lightning-fast Bluetooth OBD adapter that can turn a smart phone, tablet or laptop into a sophisticated diagnostic scan tool, trip computer, and real-time performance monitor.

Designed for seamless connectivity with Android™ and Windows® devices, MX features 128-bit encryption to ensure a secure connection, and a unique Bluetooth pairing mechanism that virtually eliminates the possibility of unauthorized wireless access.

MX can be self-installed in minutes, can access GM SW-CAN & Ford MS-CAN networks, in addition to standard OBD-II protocols. MX works with all 1996 & newer cars and light trucks sold in the United States. It also supports EOBD, JOBD, and all other international variants of OBD-II.
