

OBDLink MX

Wi-Fi

OBDLink® MX Wi-Fi is an easy-to-use, inexpensive, hacker-proof, lightning-fast Wi-Fi OBD adapter that can turn a smart phone, tablet or laptop into a sophisticated diagnostic scan tool, trip computer, and real-time performance monitor.

Designed for seamless connectivity with iOS™, Android™ and Windows® devices, MX features WPA2 with AES encryption, a sensible precaution that virtually eliminates the possibility of unauthorized wireless access.

MX can be self-installed in minutes, can access GM SW-CAN & Ford MS-CAN networks, in addition to standard OBD-II protocols. MX works with all 1996 & newer cars and light trucks sold in the United States. It also supports EOBD, JOBD, and all other international variants of OBD-II.

SUPPORTED PROTOCOLS

- SAE J2411 Single-Wire CAN (SW-CAN)
- Ford Medium-Speed CAN (MS-CAN)
- ISO 15765-4 (CAN)
- ISO 14230-4 (Keyword Protocol 2000)
- ISO 9141-2 (Asian, European, Chrysler)
- J1850 VPW (GM)
- J1850 PWM (Ford)

PRODUCT SPECIFICATIONS:

| | |
|------------------------|---|
| DIMENSIONS: | 1.97" x 1.77" x 0.91" (50 x 45 x 23 mm) |
| OPERATING VOLTAGE: | 8-18V DC |
| OPERATING CURRENT: | 80 mA |
| SLEEP CURRENT: | < 10 mA |
| OPERATING TEMPERATURE: | -4° to 131° F (-20° to 55° C) |

KEY FEATURES

- Supports SW-CAN & MS-CAN protocols
- Maximum vehicle coverage
- Up to 300% faster than nearest competitor
- Automatic sleep & wake-up
- Hacker-proof
- Small form factor
- Free firmware updates
- Compatible with most 3rd party iOS, Android, and Windows apps
- 3-year manufacturer warranty
- Supports Apple® iOS phones & tablets
- Supports Android phones & tablets
- Supports Windows PC, laptops, netbooks & tablets
- Supports Windows phone 8 & newer
- Note: This product is not compatible with hybrid or electric vehicles
